

SOLUTIONS START AT SQUARE 1

Product Overview: Smart Electronic Tax Return Reader

The Smart Electronic Tax Return Reader (SET) Reader uses a proprietary technology and a series of algorithms to extract the data from a PDF Tax Return and automatically fill the data into a spread within Credit Analysis, saving your institution valuable time in reducing the need for manual entry.

Features of SET Reader Include:

- Support for IRS Forms 1120, 1120S, 1065, and Form 1040
- Support for IRS Supplemental Schedules C, E, F, L, M1, M2 and Form 8825
- Easy navigation allows a user to browse for a PDF to import within seconds
- Spread reconciliation assures end-users of the accuracy of the data being imported
- Adds new periods to the spread of a borrower for each new tax year

Please contact us to see a demo of the SET Reader within the Square 1 Credit Suite.

What Our Customers are Saying!

"I like the product. We are all pressed for time and wearing multiple hats, so every little bit of time that we can save is definitely a benefit." -Bank in South Dakota

"I think this is a good product with many benefits and easy to use. I would say that it takes me 5-10 minutes to spread manually, compared to 30-60 seconds when using SET Reader." -Bank in Minnesota
